'Morris Sinks: European Design & Performance'

Customer Experience is at the heart of every smallest decision we take regarding Morris Sinks. High Performance and tasteful design are the essence of the European experience - the Morris experience.

Numbers that matter

Here are few key parameters worth considering while purchasing a SS sink and how Morris Sinks have ensured holistic excellence on all aspects.

10 year warranty

Morris Sinks guarantees that its sinks are designed and manufactured without defects and that they are reliable. For further details, please contact your nearest Morris Sinks Dealer.

304 grade - 18/8 stainless steel

Regarded as the best grade for stainless steel sinks, 18% nickel and 8% chromium, is known for its strength, durability and anti-corrosion properties.

0.8mm thickness

This thickness is considered as high quality and stands for higher durability. It is significantly less noisy than thinner-gauge sinks as it “absorbs” the sound of running water in your sink and is also more resistant to bowing or denting.

6mm sound dampening pad

Made of extra thick rubber material, it helps in superior sound and vibration absorption, for a quieter experience.
